

**R&A Engineering Solutions, Inc.** is seeking a full-time **Sr. Mechanical Engineer** with 10+ years of experience in either a Consulting Engineering or Design/Build environment. This position will work with a team of engineers to design the mechanical aspects of building environmental systems. Our ideal candidate is a self-motivated individual who thrives on helping clients, provides thoughtful solutions, and has a strong technical background. This position will be in-person, in our Sacramento office, and require some regional, same-day travel to jobsites throughout Northern California.

**Desired Experience:**

- 10+ years of experience as a mechanical engineer
- PE Certificate
- Building energy modeling
- Interfacing with clients
- Strong technical writing skills
- MEP Design
- Revit/AutoCAD

The position is responsible for managing projects, being involved in the design of heating, air conditioning, ventilation, and plumbing systems of buildings for the purpose of bidding and construction.

**Desired Skills:**

- Healthcare
- Hydronics
- Plumbing
- Construction Support
- BMS Controls
- Building Energy Modeling
- California Building Codes

**Desired Education:** Bachelor's Degree in Mechanical Engineering

**Benefits:**

- Health Insurance
- Dental Insurance
- Life Insurance
- 401(k) Retirement Savings Plan with Safe Harbor Matching
- Paid Vacation
- Paid Holidays
- Paid Sick Leave

**Position Salary Range:** The salary range for this position in our Sacramento office is \$105,000 to \$130,000. Benefits, bonuses and profit sharing are not included in this base salary range.
